

POLILAN®

Network Infrastructures

COMPANY HISTORY

Founded in 1994, Policabos - Soluções Técnicas de Condutores S.A., is committed to select, import, export, stock, integrate and distribute electrical and communication cables, connectors and accessories.

For over 20 years, Policabos has developed strategic partnerships with the main national and international manufacturers, built up on many years of expertise, hard work and cooperation.

Since 1995, the LAPP Group acquired a stake in the company, and since 2016, Policabos is 100% part of the group.

In June of 2018, part of the integration in the group, Policabos added to its name LAPP, hence becoming LAPP Policabos.

LAPP Policabos has over 60 employees, divided by the headquarters in Sintra, Lisboa, and the sales office in Gaia, Oporto.

The headquarters in Sintra has a warehouse with 4500 square meters which contains more than 4000 product references.

LAPP Policabos

Lapp Policabos is committed to be the supplier reference, for cable and communication solutions, connectors and accessories, in the national market, as well as the developer of the LAPP Group's business in Africa.

We want to be renowned for the flexibility and availability of our products, in the infrastructure sector, and also in the field of special data cables.

We aim to guarantee that our service fulfill our customers and other stakeholders, for which the quality of products and processes, stock management and technical support should be the basis of our company.

Involvement and commitment, training and transparency to all stakeholders and especially to our employees are the roots to the success of our mission.

COMPANY VALUES

CUSTOMER-ORIENTED

We find quick and simple solutions for our customers – at a competitive price-performance ratio. We hold our customers and partners in the highest regard and guarantee them worldwide security of supply through international production sites. This enables them to be successful in their markets.

FAMILY-ORIENTED

We work together toward our goal in a spirit of trust. Respect and appreciation are just as important to us as personal responsibility and transparency. We actively train and develop our staff .

SUCCESS-ORIENTED

Our company is very versatile. It is our flexibility above all that secures profitable growth: our reaction to new challenges is quick and well-considered. Our processes are transparent, and we make sustainable, long-term-oriented decisions. We remain conscious of our risks while driving our growth. We also set standards for your benefit.

INNOVATIVE

We continuously develop our products, solutions and services. To ensure that there is no compromise when it comes to quality, we manufacture in our own plants. We pledge ourselves to ensure the well-being of our employees and the conservation of environmental resources.

LEGEND FOR ICONS

Flame-retardant

Fire-retardant

TECHNICAL GUIDE	89

POLILAN® SOLUTION

Today, any building, commercial or residential, will only have full functionality if it has integrated a communications infrastructure solution. The same applies to a road, railway, or even an industry or photovoltaic park infrastructure - the telecommunications solution must exist to allow the transmission of telemetric data, video surveillance or even the local network.

POLILAN is a brand of structured cabling system that aims to respond to market needs regarding the quality and availability of solutions for data, voice and video networks. Complying with ISO / IEC 11801: 2011, EIA / TIA-568-D.2.1, EN 50173: 2013 standards.

Aimed at simplifying the customer's life, we have a brand that has a team specialized in technical support and logistical services.

POLILAN consists of:

- Copper solutions
- Copper accessories
- Fiber solutions
- Fiber accessories
- Telecommunications cabinets

Respect for the Environment

Aware that as a supplier we are introducing processed products into the market, it is our concern that POLILAN solutions do not use substances that are harmful to the environment, taking into account the following standards:

ROHS DIRECTIVE 2011/65 / EU

REACH REGULATION (EC) No 1907/2006 of the European Parliament & COMMISSION REGULATION (EU) No 143/2011

COPPER SOLUTION

Infrastructure categories or classes

In order to evaluate the performance of a communications infrastructure and ensure that cable networks are designed, installed and tested according to industry best practices, the following standards have been created: ISO/IEC 11801 (the international standard), EN 50173 (European standard) and ANSI/TIA 568 (American).

These standards define the categories and/or classes of cables as well as the components that constitute a communications network. What distinguishes each of the categories (or Cat.) is the maximum frequency supported as well as the attenuation and interferences supported in the conductors. The higher the frequency supported of a cable, the lower its attenuation and the higher its immunity to interferences - the higher is its performance (or bandwidth supported) and the higher is its Category.

It should be noted that all cables have eight conductors - twisted in pairs and, the conductor's thickness, the torsion step, the spacing between pairs will influence on the category given to each cable.

Category	Class	Freq (Mhz)	Bandwith	Distance (meters)	Cable shield
5E	D	100	100 Mbps	100	With or without shield
6	E	250	1Gbps	100	With or without shield
6A	EA	500	>1Gbps	100	With or without shield
7	F	600	10 Gbps	100	With shield
7A	FA	1000	>10Gbps (multimedia)	100	With shield
8.2	II	2000	40 Gbps	30	With shield

Shield or unshield Cables

For speeds higher than 1Gbps the screened cables should be used specially where exist electromagnetic interference.

Until cat 6 in most of the application it is usual to use the unshield cables, when using shielding is more common on the group of the four pairs of the cable, but it can also have a shield on each pair for better EMC protection.

For the Cables higher than cat6A it's better to use shield cables specially on each pair, the reason is because the usage of higher frequencies will create a phenomenon of EMI between adjacent pairs on the same cable or between pairs from a cable to other pairs in different cable (called AlienCrossTalk)

CAT 6A U/UTP (LSZH)

Copper Data Cable

Application

Solution category 6A unshield LSZH cables are designed for the following applications:

- 10BASE-T (IEEE 802.3)
- 4/16 Mbps TOKEN RING (IEEE 802.5)
- 100BASE-VG-AnyLAN
- 100 Mbps TP-PMD (ANSI X3T9.5)
- 100BASE-T (IEEE 802.3)
- 55/155 Mbps ATM
- 1000BASE-T (Gigabit Ethernet)
- 1.2 / 2.4 Gbps ATM
- 10G BASE-T

Standards

CAT 6A U/FTP (LSZH) Copper Data Cable

Application

Solution Category 6A U/FTP LSZH cables are designed to deliver a robust standards based performance ensuring optimum bandwidth for today's high speed network applications.

The cable is designed to support horizontal networking applications over distances up to 100 metres.

Support speeds up to 10G Base-T.

Standards

- ISO / IEC 11801,
- IEC 61156-5
- EN 50575
- EN 50399
- EN 13501-6
- EN 50288-10-1
- EN 50173
- EIA/TIA 568.2-1/568C.2

CPR

- DoP Number: PoliDoP022_00
- Class: D_{ca}-S₂,d₂,a₁

Design

1. Conductor: Solid bare copper AWG23
2. Insulation: colour-coded PE
3. Stranding: 4 pairs
4. Shield: Aluminum foil in each pair
5. Ripcord
6. Sheath: LSZH - Violet (RAL 4005)

Electrical properties at 20°C

Nominal velocity of propagation (NVP)	% of light speed	70
Max. delay skew	ns / 100m	≤ 40
Max. conductor DC resistance	(Ω / 100m at 20°C)	≤ 9,5
Max. insulation resistance	MΩ/km	5000
Impedance	Ω ; value at 1-250 MHz	100

Technical Data

Operating temperature range (°C)
-30 up to 70

Minimum bending radius
Fixed installation:

CAT 6 U/UTP (PVC or LSZH) Copper Data Cable

PoE

Application

Category 6 U / UTP cables are designed to create an Ethernet network solution that complies with Category 6, connection class E at 250MHz, in accordance with EN 50173-1 and ISO/IEC 11801.

For use in indoor environments, such as offices or ITED networks.

With excellent performance and capacity, it allows data, voice and PoE (Power over Ethernet) applications to power phones, cameras or wifi access points.

Patch Data Cable CAT 6 U/UTP LSZH

Copper Data Cable

Application

Stranded Category 6 U/UTP LSZH cables are designed to deliver a robust standards based performance ensuring optimum bandwidth for today's high speed network applications ideal to build patch cord.

Standards

- EIA/TIA 568B.2
- ISO / IEC 11801

Design

- Conductor: stranded bare copper 24 AWG
- Insulation: colour-coded PE
- Stranding: 4 pairs
- Outer sheath: LSZH (White RAL9003)
- Rated temperature: 75°C
- Conductor dimension: (7/0,18)+-0,02

Electrical Specifications

Nominal velocity of propagation (NVP)	% of light speed	69
Max. delay skew	ns/ 100m	≤ 45
Max. conductor DC resistance	(Ω/ 100m at 20°C	≤ 14
Max. insulation resistance	MΩ/km	5000
Impedance	Ω ; value at 1-250 MHz	100
Mutual capacitance	nF/ 100m; value at 1Khz	≤5,6
Max. capacitance unbalance	pF/ 100m (TIA/EIA-568B.2)	≤330

Technical Data

Operating temperature range (°C)
-20 up to 75

Minimum bending radius (Installation)
10 x outer diameter

Max. recommended pulling tension
110 N

Bulk cable weight (kg)
36 Kg/Km

Article number	Description	Color	Outer sheath	Ø (mm)	Package

CAT 5E U/UTP (PVC or LSZH) Copper Data Cable

Application

Polilan Solution Category 5e U/UTP LSZH cable is designed to deliver a robust standards based performance ensuring optimum bandwidth for today's high speed network applications.

The cable is designed to support horizontal networking applications over distances up to 100 metres.

Each Category 5e U/UTP LSZH exceeds the minimum specified performance for Category 5e U/UTP cables and supports all CLASS D applications as defined within ISO/IEC 11801 (2nd Edition):2010.

Standards

- ISO/IEC 11801 2nd Edition
- ANSI/TIA 568-B-2
- EN 50173-1
- IEC 61156-5
- EN 50288-5-1
- 10Base-T (IEEE 802.3)
- 100Base-T (IEEE 802.3)
- 1000BASE-T (Gigabit Ethernet),
- ATM-155
- Token Ring 100Mbs-1

CPR

- DoP Number: PoliDoP037_00
- Reaction to Fire: E_{ca}

Design

- Conductor: single strand of 24 AWG solid copper
- Insulation: polyolefin
- Pairing: 4 pairs
- Shield: unshield
- Outer sheath: PVC (grey) or LSZH (white)

Electrical Specifications

Module CAT 6A and CAT 6 RJ45 Shielded

ROHS

Description

This series keystone jacks work together with high speed cables, cords and panels to provide performance beyond proposed Category 6A/Category 6 standards. A new feature of this series jack is a universal colored wiring label that eliminates the need for separate codes for T568A/B wiring scheme.

- Available in Cat6A/Cat6, T568A/B wiring, meet or exceed TIA/EIA Cat6A/Cat6 requirements.
- Overall zinc alloy shielding design meets the industry standards.
- Compact jack design, 8 positions and 8 conductors.
- Contact: phosphor bronze, phosphor bronze with 6 to 50µ" gold plate.
- Accept 22-26 AWG solid with a insulation diameter of 0.4-0.6 mm.
- Easy to be terminated, low attenuation loss and high return loss.
- High reliability and superior performance.

POLILAN®

CAT 6A RJ45 Field-Plug

Application

CAT6A performance plug easy tool-free assembly, comply with 10 Gigabit Ethernet application system, suitable for connection between FD to the outlet of the work area, providing up to 550MHz. Surveillance and industrial applications.

- Overall zinc alloy shielding design meets the industry standards.
- Meet the requirements of both T568A/T568B with clear color labels.
- Solid and corrosion phosphor bronze IDC enables over 250 terminations.
- Accept 23 AWG wires, phosphor bronze contact with 50µ” goldplate, with a durability of 1500 matching recycles.
- Easy installation with clear colored labels on termination cap.

Patch Panel CAT 6 U/UTP

ROHS

CE

Application

Patch panel full loaded with 24 port RJ45 Cat6 U/UTP, 110 type, matches and exceeds CAT6 350MHZ connecting hardware specifications. Suitable for interaction and termination of horizontal cabling between devices, equipment and centralized points.

- CAT 6 UTP patch panel with unique exterior design, simple and compact.
- Compatible with 19-inch equipment racks, cabinets and wall mount shelf.
- PCB circuit board design reduces EMI/RFI interference, low attenuation loss and high return loss.
- High strength die-casted zinc alloy shielding design meets the industry shielding standards.
- Solid and corrosion phosphor bronze DC ensures over 250 terminations.
- Termination caps prevent wire from dropping off.
- With backward compatibility of CAT5E and lower classes.
- With 50μ" gold plate, durability is 1500 matching recycles.
- Solid and easy installation design saves installation and operation costs.
- All ports are clearly labeled, especially the large label in the front is helpful for network points id.

2311001890	Tool Termination 110

Approved Trade Product, but no POLILAN product.

POLILAN®

Patch Panel 24x Ports Empty

Application

The 24-port empty patch panel matches with the installation of different kinds of modular jacks, complies with Gigabit Ethernet applications, and it is suitable for interaction and termination of horizontal cabling between devices, equipment and centralized points, as well as fits for 19" equipment racks and cabinets.

- Unique exterior design, simple and compact with beautiful appearance.
- High quality engineering plastic and steel sheet with high strength.
- Ergonomic design, convenient module snap-in installation.
- Consistency black surface with any other equipment.
- Be compatible with various performance modules: shielded or unshielded.
- Solid and easy installation design saves installation and operation costs.
- Be compatible with 19-inch equipment racks, cabinets, and wall mount shelf.
- All ports are large front-end marked, easier use for operation.
- The back ends with a cable manager that effectively guides the cable to the termination point.

Faceplate Keystone

Application

Suitable for different kinds of modular jack installation, widely used in working area network cabling.

- Size: 45x45 French Style.
- Embedded surface box, easy to install; Panel surface with embedded charts and label positions for easy definition of data and voice terminal.
- With anti-dust sliding port-cover.
- Available in the 1-port and 2-port faceplate.
- Made of high quality ABS&PC.

Din Rail Keystone Adapter

ROHS

Application

This accessory hold one RJ45 keystone shield or unshield on a din-rail.
Can be fitted onto any 35 mm standard (DIN) rail - there must be a minimum distance of 10 mm between the rail and the back plane for fitting the rail adapter.
Delivery without module.
Plastic housing with labelling field and dust shutter.

Patch Cord CAT 6A S/FTP LSZH**Application**

The shielded Cat. 6A RJ45 patch cable ensures excellent performance for 10 Gigabit Ethernet applications. The TPE outer sheath makes the cable highly flexible and thus easier to handle.

The moulded grommet captivates with its slim design and thus simplifies the insertion process in cramped conditions. To be used in every applications where performance is a demand.

FIBER OPTIC SOLUTION

An optical fiber is no more than a transmission guide for an optical signal that allows communication between two points.

Advantages of using Fiber:

- Immune to external interferences
- Cost effective
- Support large amounts of information
- High distances
- Less space and low weight

In a fiber optic cable there may be the following **types of optical fibers**:

- GOF (Glass optical Fiber) - most common fiberglass, with core 9/125; 62.5 / 125 or 50/125µm.
- POF (Polymer Optical Fiber) - the so-called plastic fiber with a core of 980/1000µm.
- PCF (Polymer Cladded Fiber) - Fiber with a core of 200/230µm.

FIBER OPTICS

The choice of fiber type will depend on the application, the distance and the desired transmission speed (Bandwidth), as shown in the table below:

Fiber Type	Application	Max. Working distance		Typ. Max. Attenuation (dB/Km): ^{d)}			
		@1Gbps	@10Gbps	@650nm	@850nm	@1310nm	@1550nm
OM1 (62,5/125)	Less used, Utilities or electricity networks	275M ^{a)}	33M ^{c)}	NA	< 2.5	< 0.7	NA
OM2 (50/125)	Enterprise Networks	550M ^{a)}	82M ^{c)}	NA	< 2.5	< 0.7	NA
OM3 (50/125)	Enterprise Networks	800M ^{a)}	300M ^{c)}	NA	< 2.5	< 0.7	NA
OM4 (50/125)	Data Centers	1100M ^{a)}	550M ^{c)}	NA	< 2.5	< 0.7	NA
OM5 (50/125)	Data Centers	1100M ^{a)}	550M ^{c)}	NA	< 2.5	< 0.7	NA
SM (9/125)	High distances, Telecom Operators	>100km	>100km	NA	NA	< 0.35	< 0.21
PCF (200/230)	Industry, profinet systems	50M ^{b)}		10	8		
POF (980/1000)	Industry, profinet systems	100M ^{b)}		16			

a) Considering operation @ 1Gbps (1000Base-SX)

b) Considering operating @100Mbps

c) Considering operation '@ 10Gbps (10GBase-SR /SW)

d) Fiber attenuation always depends on the wavelength used and the number of existing fusions.

The wavelength λ (lambda) is given by $\lambda = C / f$ where C is the velocity of the light in the vacuum (300000km/s) and f the frequency.

According to the ITU-T, some variants of single-mode optical fibers (SM-Singlemode) are also defined, such as:

Fiber Optic SM (Singlemode)	
Type	Specification
G.652D	Are the most used in the market, supports bend radius up to 30mm without attenuation.
G.657A1	Supports bend radius of 10mm without added attenuation.
G.657A2	Supports bend radius of 7,5mm without added attenuation.
G.657B2	Supports bend radius of 7,5mm without added attenuation.
G.657B3	Supports bend radius of 5mm without added attenuation.
G.655	Fiber with low attenuation compared with G652D. Allow high distances single mode fiber. With non-zero dispersion shifted (NZDSF) for CWDM and DWDM Systems (Dense Wave Division Multiplexing).

Fiber optic MM (Multimode)		
Type	Bandwith (Mhz/km)	
	@850nm	@1300nm
OM1	>=160nm	>=500
OM2	>=500	>=500
OM3	>=1500	>=500
OM4	>=3500	>=500
OM5	>=3500	>=500

FIBER OPTIC CABLES

The selection of the cable, besides the type of the fibers depends, also on the application that we want to give to the cable:

Tight buffer vs. Loose tube

Types of Armour

Material	Construction	Weight	Flexibility	Rodent Protection
Steel (Metalic Armour)	Corrugated Steel	Medium	Medium	High
	Wire Armour (SWA)	High	High	High
	Screened	Medium	High	High
Fiber Glass (Dielectric Armour)	Longitudinal	Low	High	Medium
	Screened	Low	High	High

Fibers Identification Codes

Inside the cable the fibers are identified by colors.

According to:	IEC 60304/VDE0888	TIA 598-C
Fiber n.	Color	Color
1	Red	Blue
2	Green	Orange
3	Blue	Green
4	Yellow	Brown
5	White	Grey
6	Grey	White
7	Brown	Red
8	Violet	Black
9	Aqua	Yellow
10	Black	Violet
11	Orange	Pink
12	Pink	Aqua
13-24	Repeat the same sequence with black stripe

Indoor Cables

Cables to be installed indoor. They are built with external sheath that does not produce halogens neither smoke in case of fire. Typically have smaller thickness since it does not have armor.

Universal Cables

Cables to be installed indoor or outdoor. They are built with external sheath that does not produce halogens neither smoke in case of fire, but they normally have an armor that gives them protection against rodents.

Outdoor Cables

Cables to be installed only outdoor. They are built with an external robust sheath, typically made of PE. Normally always have an armor that can be dielectric or metallic, that gives better protection against rodents. The outdoor cables can also have double sheath for extra protection against moisture or water.

FO Cable ZIPCORD I-V(ZN)H

Indoor tight buffer (up to 2 FO)

Application

Fiber optic cable for indoor applications for jumper and pigtail connections or direct connection using connectors to terminal devices.

Standards

- EN 60793-1-x,
- IEC 60332-1,
- IEC 61034-2,

FO Cable DP A-DQ(ZN)B2Y

Outdoor Unitube (up to 24 FO)

Application

Fiber optic cable for outdoor applications with dielectric armour.

- Rodent protected
- Compact
- Lightweight
- Flexible
- Tough
- Resistant
- Watertight
- Reduced diameter
- Excellent resistance to friction
- Suitable for “blown air” system

Standards

- Mechanical and environmental tests according to IEC 60794-1-21 and IEC 60794-1-22.
- EN 60793-2-50; EN 60794-1-1; EN 60793-1

CPR

- DoP Number: PoliDoP050_00
- Class: F_{ca}

Design

1. Fiber optics
2. Central tube (jelly field)
3. Fiberglass Reinforcements - WB
4. Ripcord
5. Outer jacket

FO Cable DP A-DQ(ZN)B2Y

Outdoor Multitube (up to 144 FO)

Application

Fiber optic cable for outdoor applications with excellent mechanical resistance, totally dielectric.

- Rodent protected
- Excellent resistance to friction
- Excellent mechanical resistance
- Able to be blown
- Construction: A-DQ(ZN)2Y
- Reaction to Fire: F_{ca}

Standards

- Mechanical and Environmental tests according to IEC 60794-1-21 and IEC 60794-1-22.
- EN 60793-2-50; EN 60794-1-1; EN 60793-1

CPR

- DoP Number: PoliDoP051_00
- Class: F_{ca}

Design

1. Central element (GRP)
2. Fiber optics
3. Loose tube (jelly field)
4. Strength Members
5. Ripcord
6. Outer jacket

FO Cable DSP01 Metallic Armoured A-DQ(ZN)(SR)2Y

Outdoor Unitube (up to 24 FO)

Application

Fiber optic cable for outdoor applications with metallic armour.

Suitable installing in ducts, laying in cable platforms, cable shafts and even in complex cable trays, particularly where a reliable rodent protection is required.

Standards

- EN 60793-1-x
- IEC 60793-2
- IEC 60794-1-2
- EN 187 000:1992
- ISO/IEC 11801
- ISO/IEC 24702
- Mechanical and Environmental tests according to EN187000 and IEC 60794-1-2.

CPR

- DoP Number: PoliDoP039_00
- Class: F_{ca}

Design

1. Fiber optics
2. Central tube (jelly field)
3. Strength members
4. Metallic armour
5. Ripcord
6. Outer jacket (PE)

1U Sliding Patch Panel for 19" Racks

Description

This innovative, robust 1U sliding patch panel. This panel has been designed to accept up to 48 fibers housed within a 1U space. These panels include an internal mounting plate to install the adaptors giving a reduction in the bend radius of the exiting patch cords also giving a more aesthetically pleasing installation. With the ability to use a full array of adaptor types offering a flexible solution to the end user, enabling them to incorporate a multi- functional panel which allows easy access during installation or re-work with no disturbance of the existing cable or fibers.

In the addition to the array of adaptors, the panel also offers multiple cable entry solutions, up to 4 standard cable entry points for, loose tube, tight buffer, pre-terminated and steel tape armoured cable.

Each panel has integrated strength member tie positions also with the additional removable plate at the rear of the panel allows the installation of steel tape armoured cable.

Application

- Data centers, premise installations, telecommunication networks
- Ethernet, Fiber Channel, ATM, LAN, MAN and WAN
- Data communication
- Indoor applications

Features

- Up to 48 fibers in 1U
- Multiple adaptor options available
- 24 Adaptor positions
- Recessed adaptor positioning
- Individually labeled ports
- 45° open working angle
- Accepts loose tube, distribution and pre terminated cables
- RoHS, REACH SvHC and UL rated
- Fits standard 19"
- In Accordance with: TIA/EIA 568.C, ISSO/IEC 11801, EN50173, IEC60304, IEC61754

Approved Trade Product, but no POLILAN product.

FO Box IP65 Indoor/Outdoor

4 Fibers – SC or LCD Connectors

Application

This fiber distribution box offers the ability to terminate 4 fibers housed in a robust ABS Enclosure for indoor and outdoor applications (IP65 protection index).

- Data centres, premise installations, telecommunication networks.
- Ethernet, Fiber Channel, ATM, LAN, MAN and WAN.
- Data communication and telecommunication networks.

Standards

- TIA/EIA 568.C,
- ISO/IEC 11801,
- EN50173,
- IEC60304,
- IEC61754,
- EN297-1

Features

- Support SC Simplex or LC Duplex connectors
- Removable/Hinged splice tray for easy installation
- 4 adapter positions
- IP 65
- Accepts loose tube, distribution and pre-terminated cables
- Sealing glands for up to 4 exiting cables + 1 incoming cable
- ROHS, REACH & SvHC compliant
- Supplied with 4 heat shrink splice protectors
- Supplied with wall fixings

POLILAN®

Fiber Optic Accessories

Box FO 24x SC/LCD

IP65 Indoor/Outdoor

Application

This fiber distribution box offers the ability to terminate 24 fibers housed in a robust ABS Enclosure for indoor and outdoor applications (IP65 protection index).

- Data centres, premise installations, telecommunication networks.
- Ethernet, Fiber Channel, ATM, LAN, MAN and WAN.
- Data communication and telecommunication networks.

Standards

- TIA/EIA 568.C,
- ISO/IEC 11801,
- EN50173,
- IEC60304,
- IEC61754,
- EN297-1

Features

- Support SC Simplex or LC Duplex connectors
- Lockable door for added security
- Removable splice tray for easy installation
- Integrated cable tie points for securing incoming cable
- IP 65
- Accepts loose tube, distribution and pre-terminated cables
- Sealing glands for up to 24 exiting cables + 2 incoming cable
- ROHS, REACH & SvHC compliant
- Supplied with 24 heat shrink splice protectors + transit tube
- Supplied with wall fixings and tie wraps

Patch Panel FO Din-Rail

Industrial Fiber Optic Patch Panel for Din-Rail

Application

Fiber optic industrial patch panel for din-rail. To be used in switchboards where it is needed to terminate fiber optic cable.

Included:

- Housing for DIN-Rail mounting (with DIN-Rail clip)
- Integrated splice cassette
- Splice holder for 12 crimp splices
- 1 x cable gland M20

Delivery unassembled and without Front Panel.

Design

- Dimensions: 61x115x113 mm (Width x Height x Depth)
- Material: Metal and Aluminium
- Color: Grey (RAL 7035)
- Cable can entry from top or bottom (one M20 cable gland is included)

Additional components (not included):

Front Panels:

(one should be selected):

- Front plate 6 x SC duplex
- Front plate 6 x SC simplex
- Front plate 12 x SC simplex
- Front plate 12x ST simplex

Adapters:

(please check the datasheet)

Pigtails:

(please check the datasheet)

Enclosure Fiber Optic DOME (up to 144 splices)

IP68 Outdoor

Application

The DOME enclosure is suitable for protecting fiber cable splices in branching applications. Its well-engineered, injection-moulded outer body makes it impenetrable to the elements. It can protect splices and ensure reliability. It can be placed in aerial, wall mounted, or duct mounted locations.

Specifications

- Up to 144 fibers
- Easy entrance of cables
- 1 Oval plus 4 round entrance/exit for cables
- Integrated pressure valve
- Termination and splice kit included
- Integrated seal, air tight and waterproof
- Ideal for cable repair
- Suitable for aerial, underground duct or direct burial applications.
- Weight: 2,26 kg; Width: 223 mm; Depth: 450 mm

Article number		Description
2311002144		Enclosure FO DOME-01 IP68 48 Splices
2311002140		Enclosure FO DOME-02 IP68 72 Splices

Approved Trade Product, but no POLILAN product.

FO Box Ftth Indoor

2 fibers – SC or LCD connectors

Application

- Fiber optic box to terminate 1 or 2 fibers using LCD or SC adapters. Internal use.
- For Ftth applications.
- Multi cable entry points.
- Integrated fiber management.
- Include shutter to protect against lazer exposure and dust.

Standards

- TIA/EIA 568.C
- ISO/IEC 11801
- EN50173
- IEC60304
- IEC61754
- EN297-1

Product Specifications

- 2 fibers termination
- 8 cable entry points
- ABS Material
- White Color
- Support 2x SC simplex or LC duplex
- 86mm(Height) x 86mm(Width) x 25mm(Depth)

8 fibers – SC or LCD connectors

Application

- Internal fiber optic box to terminate up to 8 fibers using LCD or SC adapters flangeless.
- For ftth applications.
- Multi cable entry points.
- Integrated fiber management.

Standards

- TIA/EIA 568.C
- ISO/IEC 11801

Adapter LC & SC

ROHS

**Application**

Fiber optic adapters LC or SC to be used fiber optic enclosures or patch panels.

- Data Center
- Telecommunication Networks
- Ethernet, Fiber Channel, ATM, LAN, MAN and WAN

Standards

- IEC 61754-20
- IEC 61300-3-4
- IEC 61300-2-2
- IEC 61754-20
- IEC 61300-2-22
- REACH SvHC compliant

**Product Specifications**

High precision alignment sleeves for reliability and improved reconnectability. For single mode and multimode applications a ceramic sleeve is supplied. The housing is available in different colors with options for flange or flangeless body, metalclips or inbuilt clips. A protective cap is provided at each end of the adapter with the same color as the adapter.

Product Specification

Adapter ST

Description

The ST adapters have high precision alignment sleeves for reliability and better reconnectability.
ST adapters come with a ceramic sleeve for both singlemode and multimode adapters.

- Complies with IEC 61754-2
- Low insertion loss and high reconnectability capability
- REACH SvHC compliant
- Materials compliant to RoHS2
- Available in simplex or duplex

Pigtail Fiber Optic

ROHS

LSZH

Application

Standard pigtails provide an optimized and cost effective solution for most applications including enterprise, lan, and datacom. To be used on Patch panels, wall boxes, ODFs and splice cassettes.

Standards

- IEC 61300-3-4
- IEC 61300-3-6
- IEC 61300-3-34
- REACH & SvHC compliant

Product Features

- Available in different fiber types (SM – G.652D, G657, MM – OM1, OM2, OM3, OM4)
- Available with different connector types (LC, FC, SC, ST)
- Standard buffer low smoke zero halogen (LSZH) material with 900 micron diameter
- Zirconia ceramic ferrule connectors (Grade C)

Patch Cord Fiber Single Mode Enhanced

ROHS

LSZH

Application

Single mode patch cords are used for telecom networks and also used for high speed metropolitan and access network. The single mode patch cords are manufactured using LSZH cables which conform to IEC, EIA TIA or Telcordia standards.

The OS2 enhanced patch cords are terminated with optimized connectors which give optimum optical performance.

Standards

- ITU-T G.652D
- ITU-T G.657A1 or A2
- TIA/EIA 492AAAB
- IEC60793-2-10 A1a.1a
- IEC 61300-3-4
- IEC 60332-1
- OS1/OS2

Product Features

- FC, LC, MTRJ, MU, SC and ST connectors, UPC and APC connectors.
- Low smoke zero halogen (LSZH) jacket in yellow color.
- 900 µm or 600 µm tight buffer.
- Simplex and duplex assemblies.
- Duplex assemblies available with clips (SC and LC).
- Different connector performance range for specific application available.
- Armoured option also available.
- REACH, RoHS & SvHC materials compliant.

Product Specifications	
IL Max/Master (Acceptance)	0.25 dB (IEC 61300-3-4)
Ave/Master	0.18 dB (IEC 61300-3-4)
Return Loss	55/65 dB (IEC 61300-3-6)
Cable Material	LSZH
Strength Member	Aramid
Crush (N)	1000
Operating Temperature (°C)	-20 to 60
Fire Specification	IEC 60332-1
Attenuation (dB/km)	0.38 @ 1310 nm / 0.25 @ 1550 nm
Chromatic Dispersion (ps/nm x km)	3.0 @ 1310 nm / 18.0 @ 1550 nm

Patch cord Fiber Optic Enhanced OM3/Multimode

Application

Multimode patch cords are used to connect high speed and legacy networks like 10 gigabit ethernet, fast ethernet and ethernet. The multimode patch cords are manufactured for internal use using LSZH cables which conform to IEC, EIA TIA or Telcordia standards. The OM3 enhanced patch cords are terminated with optimized connectors which gives optimum optical performance.

Product Features

- E2000, FC, LC, MTRJ, SC and ST connectors.
- Low smoke zero halogen (LSZH) cable in aqua or purple color.
- 900 µm / 600 µm tight buffer.
- OM3 fiber conforms to ITU-T G.651.1, TIA/EIA 492AAAC, IEC60793-2-10 A1a.2a.
- Reduced Bend Sensitivity (RBS) fiber used as standard.
- Simplex and duplex assemblies.
- Duplex assemblies available with clips (SC and LC).
- Different connector performance range for specific application available.
- Armoured option also available.

Product Specifications

IL Max/Master (Acceptance)	0.25 dB (IEC 61300-3-4)
Ave/Master	0.15 dB (IEC 61300-3-4)
Ave/Random	0.20 dB (IEC 61300-3-34)
Return Loss	28 dB (IEC 61300-3-6)
Cable Material	LSZH
Strength Member	Aramid
Crush (N)	1000
Operating Temperature (°C)	-20 to 60
Fire Specification	IEC 60332-1
Attenuation (dB/km)	2,8 @ 850nm / 0,8 @ 1310 nm
Bandwidth OFL (Mhz x km)	1500 @ 850 nm / 500 @ 1310 nm

Approved Trade Product, but no POLILAN product.

Patch Cord Fiber Multimode

Enhanced OM4

Application

Multimode OM4 patch cords are used to connect high speed and legacy networks like 10/20/100 gigabit, fast ethernet and ethernet.

The multimode patch cords are manufactured for internal use using LSZH, OFNR or OFNP cables which conform to IEC, EIA TIA or Telcordia standards.

The OM4 enhanced patch cords are terminated with optimized connectors which give optimum optical performance.

Standards

- ITU-T G.651.1
- TIA/EIA 492AAAD
- IEC60793-2-10 A1a.3a
- IEC 61300-3-4
- IEC 60332-1

Product Features

- FC, LC, MTRJ, MU, SC and ST connectors.
- Low smoke zero halogen (LSZH) jacket in Erika violet color or aqua as option.
- 900 µm or 600 µm tight buffer.
- Simplex and duplex assemblies.
- Duplex assemblies available with clips (SC and LC).
- Reduced Bend Sensitivity (RBS) OM4 fiber used as standard.
- Higher optical performance available on request.
- REACH, RoHS & SvHC materials compliant.

Product Specifications	
IL Max/Master (Acceptance)	0.25 dB (IEC 61300-3-4)
Ave/Master	0.15 dB (IEC 61300-3-4)

Bandwidth OFL (Mhz x km)	3500 @ 850 nm / 500 @ 1310 nm

Fibre Optic Consumables

Cleaning Pen's

Application

Easy-to-use solution for cleaning fiber optic connectors on jumpers and in adapters. Since over 85% of network outages are attributed to dirty and/or damaged connectors, it is critical to clean every connector.

- Removing oil, dust, and dirt without damaging delicate fiber end-faces.
- Both dry and wet cleaning (add cleaning fluid).
- Clean connectors in tight spaces.
- Field or laboratory use.

Product Features

- Patented single-action cleaning in a small ergonomic design
- Variety of sizes and types for different connector styles
- Cleans connectors in both jumpers and bulkhead adapters
- Low cost per clean
- >500 cleanings (typical value)

Application

- Exquisite design with precise craftsmanship.
- Good compatibility, adapt to more servers.
- Rack's side panel can be easily assembled.
- Efficient and solid cabinet connection.
- The top and bottom wiring channel can be closed and adjusted.
- Adjustable feet and castors are included.
- Loading: 800kg (with adjustable feet).
- Advanced lock.
- Surface finish: decreasing, pickling, phosphating, powder coating.
- Available in black.
- Supplied in flat pack for easy and economy transport (divided in 3 volumes).

Standards

- ANSI/EIARS-310-D
- DIN41491
- PART1, IEC297-2, DIN41494
- PART7, GB/T3047.2-92
- Compatible with metric ETSI and 19inch international standard

Materials

- Cold-rolled steel sheet.
- Frame: 1,2 mm thickness.
- Mounting rail: 2,0 mm.
- Side panel: 1,2 mm.
- Thickness for smoky grey glass 5 mm.

Lockable side panels
Are removable with handle for better handling

Doors
Are removable with locking latches and do not require tools

Feet
Solid levelers and multi-directional casters

Fans
Supplied as accessory can support up to 4 fans

Door Lock
Front and Rear

Rectangle Ventilation Hole

Mounting Rail
With U Marks

Bottom Plate
Supplied as With lower adjustable blind plates

Wall Rack FP

ROHS

**Application**

- Exquisite design with precise craftsmanship
- Can easily be mounted on wall or placed on floor after installed feet or castor.
- Rack's side panel can be easily assembled.
- Efficient and solid cabinet connection.
- The top and bottom wiring channel can be open or closed.
- Removable front door and side panel, easily installing and maintaining.
- Loading: 60kg.
- Advanced lock.
- Surface finish: decreasing, pickling, phosphating, powder coating.
- Available in black.
- Supplied in flat pack for easy and economy transport (1 volume).

Standards

- ANSI/EIARS-310-D
- DIN41491
- PART1, IEC297-2, DIN41494
- PART7, GB/T3047.2-92
- Compatible with metric ETSI and 19 inch international standard.

**Materials**

- Cold-rolled steel sheet.
- Frame, doors and panels: 1,2 mm thickness.
- Mounting rail: 1,5mm.
- Thickness for smoky grey glass 5mm.

**Lockable side panels**

Are removable very easily with handle but can also be lockable

**Vertical cable ladders**

Are used to attach cable and PDU (power distribution units)

**Front doors**

Smoky-grey glass door, but other option exist (steel or perforated)

**Fans**

Supplied as accessory, can support up to 2 fans

POLILAN®

Racks

Rack Accessories For 19" Racks

THERMOSTAT

Application

To control the rack's ventilation kit.
Support not included.

Standards

- EN 55014-1-2
- EN 61000-3-2
- EN 61000-3-3

Product Specifications

- Input and output voltage: 220V
- Connection 2-pole terminal for 2,5mm²
- Clip for 35mm DIN rail
- Plastic UL94 V-0 Light Grey Color
- Contact resistance <10m
- 60mm(Height) x 33mm(Width) x 43mm(Depth)

THERMOSTAT WITH DISPLAY

Application

To control the rack's ventilation kit
with digital display given immediate
information about rack's temperature.

Product Specifications

- Measuring range: 1~99°C
- Affiliated sensor: NTC thermistor sensor
- Sampling rate: 500ms
- Output type: master relay output, internal buzzer alert
- To be used on 19" rack's

RACK VENTILATORS

(PN 2311003661)

(PN 2311003660)

Article number	Description
2311000953	Rack thermostat
2311003659	Thermostat with display
2311000968	Rack Vent 1FAN
2311000976	Rack Vent 2FAN
2311003661	Rack Vent 1FAN for FP rack
2311003660	Rack Vent 2FAN for FP rack

Approved Trade Product, but no POLILAN product.

Management Cable Bar 1U BK

Application

Management cable bars is suitable for 19" racks, 1U.
For cable routing and management inside racks.
Data centers, premise installations, telecommunication networks.

Standards

- ISO/IEC 11801
- TIA/EIA 568.C
- EN50173
- IEC60304
- IEC61754

(PN 2311001887)

(PN 2311002862)

Design

- Versions with brush, with rings and with brush and rings.

Article number	Description	External dimensions (mm)	Color	N° rings
2311001887	Manage Cable Bar 19" 1U w/Brush	44(H)x482.6(W)x44(D)	Black	NA
2311001882	Manage Cable Bar 19" 1U BK w/Rings	44(H)x482.6(W)x88(D)	Black	4 (74mm deep)
2311002862	Manage Cable Bar 19" 1U BK w/5 Rings	44(H)x482.6(W)x77(D)	Black	5 (68mm deep)
2311003107	Manage Cable Bar 19" 1U W/Brush w/Rings	44(H)x482.6(W)x88(D)	Black	4 (74mm deep)

POLILAN®

Racks

Shelf For 19" Racks

Application

To be installed on a 19" racks, it is used to support communications devices, manuals or other equipments that needs to be stored inside the rack.

It has versions with frontal mounting (2 points) or with four fixing points.

Standards

- ANSI/EIARS-310-D
- DIN41491
- PART1, IEC297-2, DIN41494
- PART7, GB/T3047.2-92
- Compatible with metric ETSI and 19inch international standard.

Materials

- Cold-rolled steel sheet
- 1,5mm thickness

Shelf 19" 2 Fixpoints BK 400mm
(2311090435)

Shelf 19" 4 Fixpoints BK Adjustable
(2311000988)

Article number	Description	Fixing points	Height (RU)	Depth (mm)
2311000985	Shelf 19" 2 Fixpoints BK 250mm	2	1U	250
2311000945	Shelf 19" 2 Fixpoints 350mm	2	1U	350
2311090435	Shelf 19" 2 Fixpoints 400mm	2	1U	400
2311000980	Shelf 19" 2 Fixpoints BK 450mm	2	1U	450
2311003063	Shelf 19" 2 Fixpoints BK 600mm	2	1U	600
2311000988	Shelf 19" 4 Fixpoints Adjust 425-760mm	4	1U	Adjustable
2311000981	Shelf 19" 4 Fixpoints BK 600mm	4	1U	600
2311003089	Shelf 19" 4 Fixpoints BK 1000mm	4	1U	1000

Approved Trade Product, but no POLILAN product.

TECHNICAL GUIDE

IP PROTECTION GRADE IEC/EN 60529	92
FIBER OPTIC CABLES - DESIGNATION CODE	93
STANDARDS FOR COPPER DATA CABLES AND FIBER OPTIC	94
AWG WIRE SIZES AND POE TYPES	95
CONSTRUCTION PRODUCTS REGULATION (CPR)	96

IP Protection Grade IEC/EN 60529

Waterproof and Dustproof Grade

Application

The IEC has developed the ingress protection (IP) ratings, which grade the resistance of an enclosure against the intrusion of dust or liquids.

The ratings are widely used throughout industry.

The IP code is composed of two numerals:

- The first refers to the protection against solid object (scale 0 up to 6).
- The second refers the rate protection against liquids (scale 0 up to 9).

Standards

- IEC/EN 60529

Example:

IP65

Protection against water jets

Complete protection against solid objects

1 st Digit (Solid objects)	Explanation	2 nd Digit (Water ingress)	Explanation
0	No protection	0	No protection
1	Protection against solid bodies larger than 50mm	1	Protection against vertically falling drops of water (condensation)
2	Protected against solid bodies larger than 12,5mm	2	Protection against drops of water falling up to 15° degrees from vertical
3	Protected against solid bodies larger than 2,5mm	3	Protection against spraying water
4	Protected against solid bodies larger than 1mm	4	Protection against projections of water from all directions
5	Protected against dust	5	Protection against water jets
6	Completely protected	6	Protection against powerful water jets
		7	Protection against the effects of temporary immersion in water
		8	Protection against the effects of continuous immersion in water
		9	Protection against high pressure and temperature water jets

Number of fibers	
n	Number of fibers
n x m	Number of tubes x number of fibers in each tube

Sheath	
H	Made of halogen-free material
M	Made of lead
Y	Made of PVC
2Y	Made of PE
4Y	Made of PA
11Y	Made of TPE-U (PUR)

Construction details from inside to outside	
B	Armouring
1B	Armouring with one layer steel band
2B	Armouring with two layers steel band
Q	Water resist materials in cable core
(L)	Plain, overlapping aluminium foil
S	Metal stranding element
(SR)	Steel braids
(ZN)	Non-metallic yarn reinforcement
(ZS)	Metallic strain-relief/supporting elements in cable core
BN	Non-metallic armouring
R	Armouring with steel wires

Type	
B	Loose tube unfilled
D	Loose tube, filled
DA	Loose tube, made of aluminium, filled
DS	Loose tube made of steel, filled
V	Tight buffer

Product application	
A	Outdoor cable
AT	Outdoor cable, divisible
J	Indoor cable
U or J/A	Universal (indoor & outdoor) cable
ADSS	All dielectric Self-supporting overhead cable

Number of fibers

n	Number of fibers
n x m	Number of tubes x number of fibers in each tube

Sheath

H	Made of halogen-free material
M	Made of lead
Y	Made of PVC
2Y	Made of PE
4Y	Made of PA
11Y	Made of TPE-U (PUR)

Construction details from inside to outside

Product application

A	Outdoor cable
AT	Outdoor cable, divisible
J	Indoor cable
U or J/A	Universal (indoor & outdoor) cable
ADSS	All dielectric Self-supporting overhead cable

Example:

J-V(ZN)H 8x1 E9/125

Indoor cable with 8 tightly buffered fibers (singlemode) and halogenfree outer sheath, yarn reinforcing under the sheath.

A-DQ(ZN)SR(2Y) 4x12 G50/125 OM2

Outdoor cable with filled loose tube and swellable dry water blocking in the core with polyethylene sheathing. Yarn reinforcement under the corrugated steel tape armour. The cable has 4 tubes with 12 fibers 50/125 OM2 each.

Standards for Copper Data Cables and Fiber Optic

SYMMETRICAL COPPER DATA CABLES

Standard	Subject
ISO/IEC 11801	Information technology and application-independent wiring systems.
IEC 61156	Multiconductor and symmetrical pair-/star quad twisted cable for the digital communication transmission.
EN 50173	Information technology: Generic cabling Part 1: General requirements Part 2: Office premises Part 3: Industrial premises Part 4: Homes Part 5: Data centres Part 6: Distributed building services
EN 50174	Information technology: Cabling installation Part 1: Specification and quality assurance Part 2: Installation planning and practices inside buildings Part 3: Installation planning and practices outside buildings
EN 50288	Multiconductor metallic data and control cables for an analogue and digital transmission.
EN 55022	EMC standards for office surroundings.
EN 50575	Power, control and communication cables. Cables for general applications in construction works subject to reaction to fire requirements.
EN 50399	Common test methods for cables under fire conditions - Heat release and smoke production measurement on cables during flame spread test - Test apparatus, procedures, results.
EN 13501	Fire classification of construction products and building elements.

FIBER OPTIC CABLES

Standard	Subject
IEC 60793-1	Fiber optic characteristics
IEC 60794-1	Fiber optic cable characteristics
IEC 60331-25 / EN50200 PH30/PH120	Fire resistant test procedure Circuit integrity
IEC 60332-3 / EN60332-3	Fire retardant test procedure
IEC 60332-1 / EN60332-1	Flame retardant test procedure
IEC 61034-2 / EN61034-2	Low smoke emission test procedure

Test method	Test type	Test criteria
IEC 60794-1-2-E1	Tensile performance	Fibre elongation
IEC 60794-1-2-E3	Crush resistance	Fibre attenuation
IEC 60794-1-2-E4	Impact	No damage to the sheath and cable elements
IEC 60794-1-2-E6	Repeated bending	No fibre break
IEC 60794-1-2-E11	Bend	Fibre attenuation
IEC 60794-1-2-E7	Torsion	Fibre attenuation
IEC 60794-1-2-F5	Water penetration	Water penetration
IEC 60794-1-2-F1	Temperature cycling	Fibre attenuation

AWG Wire Sizes and POE Types

AWG WIRE SIZES

AWG	Min. Diameter Solid Conductor ^(a) (mm)	Cross Section Stranded Conductor ^(a) (mm ²)
18	1.013	0.807
19	0.866 ^(b)	0.641
20	0.772 ^(b)	0.509
21	0.688 ^(b)	0.404
22	0.610 ^(b)	0.318
23	0.546 ^(b)	0.254
24	0.485 ^(b)	0.201
25	0.432 ^(b)	0.159
26	0.384 ^(b)	0.126
27	0.358	0.100
28	0.318	0.079

^(a) According to UL 444 as of 11 July 2008

^(b) Minimum acceptable diameter (0.95 x nominal) of a solid conductor of this size

POE TYPES

POE (Power Over Ethernet) is the capability to transport on the same cable energy and communication.

Standard	Name	Type	Class	Power Source Equip (PSE)	Powered Device (PD)	Pairs
802.3af	POE	Type 1	Class 1	4W	3.84W	2
			Class 2	7W	6.5W	2
			Class 3	15.4W	12.95W	2
802.3at	POE+	Type 2	Class 4	30W	25.5W	2
802.3bt	POE++ 4PPOE	Type 3	Class 5	45W	40W	4
			Class 6	60W	51W	4
		Type 4	Class 7	75W	62W	4
			Class 8	90W	72W	4

Due to the high power need to transport, especially on 802.3bt it is recommended to use cables with AWG23 or AWG22.

Construction Products Regulation (CPR)

The use of cables in construction works is practically as old as the transmission of electrical power itself. However, the classification of cables as a construction product only gained momentum when (CPR) Regulation (EU) no. 305/2011 came into effect in July 2013, and when the European standard EN 50575 was published in September 2014.

Date of applicability of the regulation was at 10 of June of 2016.

This refers to cables within the scope of application of a harmonised standard, namely EN 50575:2014 + A1:2016.

The Fire Behaviour is the CPR new classification for cables, this regulation establish rules for the security of products.

The cables must comply with the 7 class of CPR, the next table shows them and the tests that apply to each class:

CPR Class	Classification criteria	Additional criteria	AVCP System
A_{ca}	EN ISO 1716 Gross heat of combustion		
B1_{ca}	EN 50399 Heat release	Smoke production (s1a, s1b, s2, s3) EN 50399/EN 61034-2	"1+", including: • Initial type-testing and continuous surveillance • Audit & testing of samples by 3 rd party certification body
B2_{ca}	Flame spread EN 60332-3		
C_{ca}	Fire retardant EN 60332-1-2 Flame retardant	Acidity (a1, a2, a3) EN 60754-2	
D_{ca}	EN50399 Heat release Flame spread EN60332-1-2 Flame retardant	Flaming droplets (d0,d1,d2) EN 50399	"3", including: • initial type-testing by 3 rd party laboratory • factory production control by manufacturer
E_{ca}	EN 60332-1-2 Flame propagation		
F_{ca}	EN 60332-1-2 Flame propagation (not conform with E _{ca} Class)		"4": • Initial type-testing and factory production control by manufacturer

Example of a DoP:

On our website you will find detailed information about application of the CPR regarding cables: <http://policabos.pt>
